

Why Diamon-Fusion®

Homeowners, designers, architects, and developers around the world are requesting Diamon-Fusion® protective coating on their glass and silica-based surfaces. Its stain-resistant, easy-to-clean formula has been applied to millions of shower doors, as well as prestigious landmarks and commercial buildings globally. It is the leading choice of protective coatings for shower door manufacturers worldwide.

Diamon-Fusion® has been independently tested for durability and not only does it outperform other coatings, but no aftercare products are required to maintain the warranty.

Recommended Cleaning Products:

- ◆ Ammonia-Free Windex®
- ◆ Sparkle® Ammonia-Free Glass Cleaner
- ◆ Sprayway® Ammonia-Free Glass Cleaner
- ◆ White household vinegar diluted with water
- ◆ Seventh Generation™ Natural Glass & Surface Cleaner

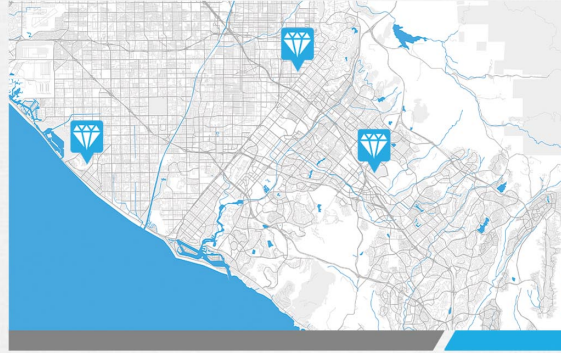

What People are Saying

"Just as promised. My doors don't spot and look great everytime. Super easy to rinse and squeegee. I only wish I got it applied sooner on my shower door."

– Jim N., Wilmington, DE

"Diamon-Fusion® was applied to our new shower enclosure and the maintenance is a piece of cake. There is no evidence of any soap scum or water marks. I couldn't be more pleased with the results."

– Joel R., Armonk, NY

Where to Find Diamon-Fusion®

Diamon-Fusion® is available through a network of certified Diamon-Fusion® dealers who are professionally trained and equipped to protect your glass investments.

Easy-to-Clean Shower Glass Protection

Diamon-Fusion® keeps glass surfaces looking cleaner for longer.

Industry-leading easy-clean coating

Protect your glass investments and keep your shower door looking as beautiful as the day it was installed with Diamon-Fusion® protective coating. By chemically bonding to the surface of the glass, Diamon-Fusion® transforms ordinary glass into a high-performing, water-repellent surface that helps prevent staining. Similar to how a non-stick cooking pan works, surfaces treated with Diamon-Fusion® become easier to clean and require less care to maintain.

Cuts cleaning time up to 90%

Invisible barrier repels water for easier cleaning, giving you more free time

Protects against hard water stains

Helps prevent the buildup of limescale, minerals, and soap scum

Eliminates harsh chemical cleaners

Eco-friendly; saves on water usage and costly cleaners, creating a better environment

Keeps glass cleaner for longer

Reduces the frequency of cleaning

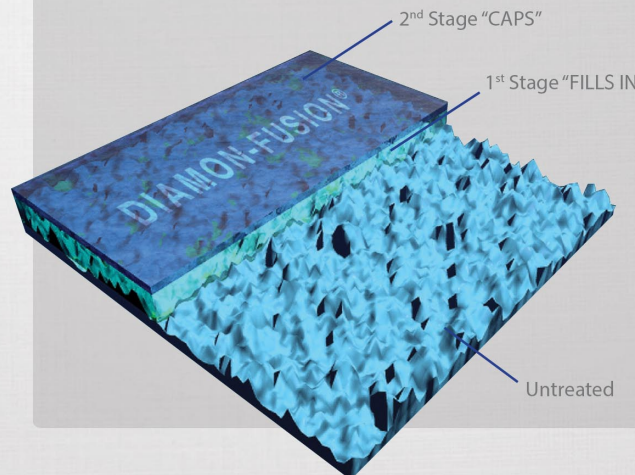

24/7 bacterial protection

Independent testing shows that shower glass treated with Diamon-Fusion® helps reduce bacterial growth for the lifetime of the surface. The coating continuously works to keep shower glass cleaner for longer and inhibits the growth of harmful microbes. Any microbes that remain on the glass can easily be washed away.

How Diamon-Fusion® works

At a microscopic level, glass is actually quite rough. Inevitably, this allows minerals from hard water, soap scum, and other contaminants to easily penetrate the surface, causing unwanted stains. Diamon-Fusion® is a patented, two-step process that chemically bonds to glass filling in the peaks and valleys of the surface.

Multiple surfaces – one solution

- Shower doors
- Windows
- Glass railings
- Solar panels
- Glass table tops
- Tile, porcelain, and granite

Lifetime warranty

Ultra-thin and transparent, Diamon-Fusion® is backed by an unprecedented lifetime warranty for shower doors, as long as the basic manufacturer care recommendations are followed. The glass coating is guaranteed to remain more water-repellent than an untreated surface and will never chip, crack, peel, yellow, or haze.

The invisible barrier created during the Diamon-Fusion® process is also UV-resistant, which means the coating will not degrade over time when exposed to sunlight.
